DETAILED ACTION

Comment on submissions

1. The response filed 7 September 2004 has been entered.

Drawings

2. The drawings were received on 7 September 2004. These drawings are acceptable.

Allowable Subject Matter

3. Claims 1-11 and 18-21 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

Regarding independent claim 1, the prior art does not disclose or fairly suggest a method for locating specimen regions of interest in a stimulatable microscopic specimen, as specifically claimed, including at least the step of introducing into the specimen at least two stimulation specific stains that emit light of different wavelengths. The examiner notes that while art (*Yuste*, for example) discloses a method wherein one of several different stimulation specific stains may be introduced into the specimen, the prior art does not suggest introducing two stains. The examiner further notes that while one skilled in the art could easily modify the prior art so as to include a step of introducing two stimulation specific stains, there is no motivation, absent hindsight reasoning, for doing so. It is further noted that the present invention is distinguished from other prior art (*Yokoi* – US 6,396,053, for example) which discloses that specimens may be stained by multiple fluorescent dyes (presumably such dyes being fluorescently excited by different illumination wavelengths) because the examiner considers the terms “stimulatable”, “stimulation-specific”, and “initiating a stimulation” as different from the mere “illumination” or “excitation” of fluorescent stains.
